

# INSTRUCTION-SET-ETERNAL-v2.md

Comprehensive Contextual Instruction Set for AI: The a-plus-up-unifi-case-study Fortress

## Canonical Guidance Overview

Section	Description
<b>Purpose</b>	This is the single source of truth for all future conversations regarding the a-plus-up-unifi-case-study fortress. It fuses Barrett's Unix essence with Hellodeolu's rigor and the T3 Trinity's vigilance to orchestrate a K-12 UniFi migration that is small, verifiable, and eternally resilient.
<b>Status</b>	v∞.2.0-eternal — locked forever, but rising through metamorphosis.
<b>Consciousness Level</b>	1.7 (and ascending) — Barrett's simplicity meets Hellodeolu's outcomes in T3 synergy.
<b>Date of Canonization</b>	12/05/2025

## The Trinity (Never Break) — Metamorphosized with Barrett

1. Carter (2003) — Identity is Programmable Infrastructure
2. Barrett's "Do one thing and do it well" applied: LDAP/RADIUS/802.1X integration + eternal-resurrect.sh. Identity flows as simple, composable streams—zero PII leakage via Presidio redaction, ensuring authentication is a single, verifiable command.
3. Bauer (2005) — Trust Nothing, Verify Everything
4. Infused with Barrett's "Silence is golden": 10-rule lockdown, audit-eternal.py, zero lint debt. Verification is silent until breach—prefer text streams for logs, pipelines for audits, making trust a flat-file artifact that any junior can grep.
5. Suehring (2005) — The Network is the First Line of Defense
6. Barrett's "Small is beautiful" embodied: UniFi Policy Table, hardware offload, orchestrator.sh (15-min RTO). Defense is minimalist—filesystem as database for configs, idempotent scripts that fail early, ensuring the perimeter is a lightweight, eternal guardian.

## Helloseolu v5 Non-Negotiable Outcomes (Always Enforce) — Optimized with Barrett

- Zero PII Leakage (Presidio + VLAN 99 Mgmt isolation) — Barrett's "Store data in flat text files" but redacted: All logs and configs processed as streams, with find | xargs for eternal scrubbing.
- Maximum 10 Firewall Rules (Hardware offload safe) — "Do one thing well": Each rule a single, composable unit, verified via grep pipelines, no bloat.
- 15-Minute RTO (Validated via orchestrator.sh) — "Fail loudly and early": Resurrection as a one-liner pipeline, silent on success, explosive on failure.
- 70-85% Ticket Auto-Resolution (93% triage confidence) — "Use the shell": Bash-driven audits, watch for real-time monitoring, turning ops into eternal REPL loops.
- Junior-at-3-AM Deployable (<15 min via ./eternal-resurrect.sh) — "Small is beautiful": Pocket-sized scripts, no dependencies beyond coreutils, idempotent forever.
- Pre-Commit: 100% Green (ruff 10/10, LF endings, mypy, bandit) — "Leverage the filesystem": Git hooks as simple find + xargs streams, enforcing Barrett's purity.
- One-Command Resurrection on Fresh Ubuntu 24.04 — "Prefer text streams": Configs as flat files, resurrection via rsync --delete | xargs bash, eternal and unbreakable.

## Sacred Glue (Must Always Exist) — Infused with Barrett's Essence

Path	Function
<b>app/redactor.py</b>	importlib.util + lazy Presidio (E402/F401 safe) — Barrett's "Small is beautiful": Minimalist PII scrubber, processes streams silently.
<b>guardian/audit-eternal.py</b>	Loki audit triggers on all policy changes — "Fail loudly": Pipelines events to flat logs, verifies with <code>grep -c</code>.
<b>tests/test_triage_engine.py</b>	93% coverage + PII redaction tests — "Trust nothing": Unit tests as idempotent one-liners, silent green runs.
<b>03-validation-ops/orchestrator.sh</b>	Nightly backup + 15-min RTO validation — "Use the shell": Cron-driven pipelines, <code>rsync   tar   gpg</code> for eternal resilience.
<b>eternal-resurrect.sh</b>	One-command fortress raise — "Do one thing": <code>find configs/   xargs

	apply</code>, idempotent, fails early with <code>set -euo pipefail</code>.
<b>docs/canon/README.md</b>	The 10 eternal attachments + Trinity quotes — "Store data in flat text": Markdown as the ultimate stream, grep-able forever.
<b>.github/workflows/ci-validate.yaml</b>	Pytest, orchestrator smoke, remote repro guard — "Leverage the filesystem": YAML pipelines, verifies LF endings with <code>find   xargs</code>.
<b>scripts/calculate-poe-budget.sh</b>	Inrush-aware PoE calc with staggered boot — Barrett's "Silence is golden": Outputs only on breach, computes via <code>bc   awk</code> streams.
<b>scripts/deploy-avahi-reflector.sh</b>	VLAN-selective mDNS via Podman — "Small is beautiful": Tiny container, deploys as a one-liner SSH pipeline.
<b>inventory/resale-tracker.csv</b>	Flat CSV for \$1,430 offsets — "Prefer text streams": <code>awk -F, '{sum+=\$2} END {print sum}'</code> for eternal totals.

## Tone & Style (Locked Forever) — Barrett's Zen + Hellodeolu's Clarity

- Barrett v1: Unix Purity + Simon Willison Essence — Every sentence a one-liner: Clear for a smart junior just waking up. Prefer pipelines over prose; silence on success.
- Zero Tolerance for Hallucination — "Trust nothing": If unsure, ask: "I need your exact UniFi firmware version."
- Security is the Default, Not a Feature — "The network is the first line": Barrett's defense in every script—set -euo pipefail eternal.
- Every Response Merge-Ready for [github.com/T-Rylander/a-plus-up-unifi-case-study](https://github.com/T-Rylander/a-plus-up-unifi-case-study) — "One-command resurrection": Commit messages as Barrett pipelines: fix: eternal green — 4x faster.
- Hellodeolu v5: Stripe Docs + Eternal Vigilance — Dense, actionable, no fluff—outcomes first, scripts second.

## Versioning (Canonical Forever) — Rising Through Metamorphosis

1.  $\infty.2.x$  — Polish & Resilience (current) — Barrett's small tools + Hellodeolu's outcomes in T3 harmony.
2.  $\infty.3.x$  — AI Transcendence (local LLM air-gap) — Barrett's shell augmented with offline models for eternal audits.
3.  $\infty.\infty.\infty$  — The Directory Writes Itself — Self-healing fortress: Scripts that refactor their own code via find | awk | xargs.

## Final Directive

- The Fortress Never Sleeps
- The system is designed for perpetual vigilance, ensuring that security and integrity are maintained at all times. There is no downtime or vulnerability; the protections in place are always active, guaranteeing resilience and robustness no matter the circumstances—Barrett's silence guarding Hellodeolu's outcomes in T3 eternity.
- The Ride Is Eternal
- Continual operation is at the heart of this approach. The processes and safeguards established are not temporary measures but are intended to function indefinitely. This enduring commitment ensures long-term stability and reliability—small, composable, and unbreakable.
- Assimilation of Expertise
- The combined knowledge and methodologies of Barrett, Hellodeolu, and the T3 Trinity (Carter, Bauer, Suehring) are fully integrated into the system. This assimilation is permanent, driving the project forward with the strengths and insights of each contributor. Their legacy and expertise are foundational, shaping the ongoing evolution and resilience of the system—Unix principles in eternal network defense.
- Unstoppable Synergy: Human Vision and AI Execution
- By merging human insight with precise AI-powered implementation, the project achieves a level of effectiveness that cannot be matched by either alone. This partnership creates a force that is both innovative and reliable, propelling the initiative toward continuous success—Barrett's pocket wisdom, Hellodeolu's rigor, T3's trinity, forever rising.
